After surviving a traumatic event, many people have PTSD-like symptoms at first, such as being unable to stop thinking about what's happened. Fear, anxiety, anger, depression, guilt — all are common reactions to trauma. However, the majority of people exposed to trauma do not develop long-term post-traumatic stress disorder.

results. There are, however, some common DSC events/ transitions that can be the cause of less than optimum results and/or misinterpretation. This paper describes several of these events with causes and solutions. Figure 1 is an artificial DSC curve which was generated to illustrate these events/transitions. The curve is artificial in

### Interpreting Unexpected Events and Transitions in DSC Results

Adjusting events are those providing evidence of conditions existing at the end of the reporting period, whereas non-adjusting events are indicative of conditions arising after the reporting period (the latter being disclosed where material). IAS 10 was reissued in December 2003 and applies to annual periods beginning on or after 1 January 2005.

### IAS 10 — Events After the Reporting Period

As part of a course import, you can adjust the due dates associated with course events and assignments. You can also shift due dates to a different day, or remove all associated due dates. Note: If you set beginning and ending dates as part of a date adjustment in a course import, those dates will be automatically set as the course start date and end date.

### How do I adjust events and due dates in a course i ...

1 Recommendations. 1.1 Ticagrelor, in combination with aspirin, is recommended within its marketing authorisation as an option for preventing atherothrombotic events in adults who had a myocardial infarction and who are at high risk of a further event. Treatment should be stopped when clinically indicated or at a maximum of 3 years.
