The White Paper by Weaver has the peak weld force/length (f_w) at 2,390lbf/in from hand calculation at the top (page 5). While the Ansys Model peaked at 2,775lbf/in for 10 elements along the weld line (WELDFORCE10.txt), as the number of elements increased, so too did the force/length. It appears to be a singularity there though the good news is that if one is to use the "hot spot method", the ...
