making it so no food will cook on the surface and tiny hand reaching up are less likely to get burned. Furthermore, because it works faster to cook your food, it is a more energy-efficient option that doesn't heat up your kitchen.

Troubleshooting Why Your Induction Cooktop Isn't Heating ...

The difference may be from \$1000 to \$2000. This is because dual fuel ranges usually have more enhanced features, like that electric oven, than gas ranges do. Dual fuel ranges will be a right choice if you are a professional cook who loves the heat efficiency of the gas cooktop combined with the precise temperature control of an electric oven.
