Even though most  
breech babies are born  
healthy, there is a  
slightly elevated risk  
for certain problems.  
Birth defects are  
slightly more common  
in breech babies and  
the defect might be the  
reason that the baby

starts, rest assured that your baby is most likely to be in a head-down position, ready to be born. Your midwife will tell you what position your baby's in during your routine antenatal checks. If she thinks that your baby is still breech at 36 weeks, she'll offer you an ultrasound scan to check your baby's position.
