A cladogram is a diagram that represents a hypothetical relationship between groups of organisms, including their common ancestors. The term "cladogram" comes from the Greek words cladus, which means "branch," and gramma, which means "character."The diagram resembles the branches of a tree that extend outward from a trunk. However, the shape of the cladogram isn't necessarily vertical.

From a logical point of view, the rule has been violated whenever someone goes to Boston without taking the subway. Hence the logically correct answer is to turn over the Boston card (to see if this person took the subway) and the cab card (to see if the person taking the cab went to Boston). More generally, for a rule of the form If P then Q, one should turn over the cards that represent the ...
