Go Math Break Apart To Subtract | necbooks.us

Breaking apart arrays is another effective strategy for students who are learning multiplication, and helps model distributive property. For example: students usually learn their twos and their fives sooner than the larger times tables, so that when faced with a problem like 6×7 , students can instead look at the 7 as a $(5+2)$ instead. Like this: $6 \times (5+2)$ OR $(6 \times 2) + (6 \times 5) = 12 + 30 = 42$.
