How to Tell the Difference between Quackgrass, Fescue and ...

First, Know What Type of Grass You're Growing . Grass is grass, right? Not really! Ornamental grasses are grouped into three categories: warm season, cool season, and evergreen. Most evergreen "grasses" aren't really in the grass family, like sedges and carex--and those don't need pruning. (They can be divided if they get unruly.)

How to Cut Back Ornamental Grasses in Spring or Fall

Research how to make compost, the heat of a compost pile will kill the seeds and "kill the grass". The state it is in now - it will continue to grow because there are seeds in there, and those can wait for perfect conditions to grow for years. As soon as there is enough moisture and heat to germinate, it will grow.
