Molten salt systems can be used in reactors as a fuel itself, as a primary coolant or as a heat transfer, and also to recycle spent fuels. All of these applications are described in the Generation-IV ~GEN-IV! system research plan of the molten salt

Molten Salts

Chemistry and Technology

A molten salt reactor (MSR) is a class of nuclear fission reactor in which the primary nuclear reactor coolant and/or the fuel is a molten salt mixture.

Molten salt reactor - Wikipedia

1. Introduction. Ole Kleppa and associates have accurately measured the
