systems and hot-water supply by using refrigerant. Do not use the compressor for any other purposes that are not intended or departing from ... - If you resell the compressor, never fail to attach this manual to the compressor.

## **Model 6HK Reciprocating Compressor INSTRUCTION MANUAL**

Commercially, ammonia is made by combining free nitrogen and hydrogen gases under high pressure and temperature in the presence of a catalyst. The process most commonly used is the Harber-Bosch method. Anhydrous ammonia is the liquid form of pure ammonia gas, technically water-free, and the substance used universally as an industrial refrigerant.

While our screw compressors are suitable for all common refrigerants, GEA focuses on the natural refrigerants NH<sub>3</sub> (ammonia) and CO<sub>2</sub> (carbon dioxide). Due to its high volumetric efficiency and zero global warming potential, NH<sub>3</sub> is a particularly future-proof choice. Learn more with GEA RTSelect - our product selection and configuration tool.
