Artificial beings with intelligence appeared as storytelling devices in antiquity, and have been common in fiction, as in Mary Shelley's Frankenstein or Karel Čapek's R.U.R. These characters and their fates raised many of the same issues now discussed in the ethics of artificial intelligence.. The study of mechanical or "formal" reasoning began with philosophers and mathematicians in antiquity.

Artificial intelligence - Wikipedia

In computability theory, the Ackermann function, named after Wilhelm Ackermann, is one of the simplest and earliest-discovered examples of a total computable function that is not primitive recursive.All primitive recursive functions are total and computable, but the Ackermann function illustrates that not all total computable functions are primitive recursive.

A Turing machine is a mathematical model of computation that defines an abstract machine that manipulates symbols on a strip of tape according to a table of rules. Despite the model's simplicity, given any computer algorithm, a Turing machine capable of implementing that algorithm's logic can be constructed.. The machine operates on an infinite memory tape divided into discrete "cells".
