Synopsis There are around 200,000 healthcare-associated infections (HAIs) in Australian acute healthcare facilities each year. This makes HAIs the most common complication affecting patients in hospital. As well as causing unnecessary pain and suffering for patients and their families, these adverse events prolong hospital stays and are costly to the health system.

Any primary-care doctor will tell you that the physical-health toll of collective trauma — high blood pressure, headaches, herniated discs — have become quite common. And this has been before many people have returned to the office or resumed their pre-pandemic schedules. The mental-health crisis of the pandemic is also very real.
